

## Drum Clamp

Drum Clamp - Forklifts are used to deal with moving, lifting and storing pallets. For companies which deal with items inside drums, you will need to utilize an attachment so as to lift, store and move them. There are numerous drum forklift accessories that you could obtain for all your drum storing, moving and lifting needs. These attachments are particularly meant so as to deal with drum containers - thus there is no risk of damage to the item or drum container when they are lifted, stored or moved.

### Drum Positioner And Grab

The drum positioner could be used in order to load and unload drums off of vehicles, racks, and drum stands. These are available in three or four tine models. This particular accessory is completely automatic, hence allowing the operator to be able to operate all from the comfort of the forklift seat. Able to move large and extra large plastic drums, steel, its capacity is 210 liters. This accessory is utilized for drum pyramid stacking.

The drum grab could be mounted to the forks, with a designed objective of handling steel drums which have rolling hoops. Though the original reason for the design was to deal with steel drums with rolling hoops, the drum grab can help accommodate plastic drums also. Drum capacity maximum is 210 liters for steel drums with rolling hoops and 220 liters for plastic drums.

### The Rotator

The drum rotator is another forklift accessory that mounts onto the blades themselves. Their purpose is to pick up the drum and rotate it upside down. The drum is clasped into the drum rotator using a clamp which fits around the center of the drum. The rotation is executed by either a crank handle or a continuous loop chain. The crank handle is meant for operations that happen below shoulder level. For operations that should take place over shoulder level, the continual loop chain will be used.

The drum tines are simple fork or carriage mounted attachments. They are designed for stacking and unstacking 210-liter metal drums. Stacking requires nothing elaborate, just easy horizontal positioning of the drums. The carriage-mounted accessories lessen the load center of the drums.

### Automatic Tongs

Drum tongs come in semi-automatic and automatic units. They are used in the open topped or tight head steel drum styles. The drum tongs can be connected in a couple of ways to the lift truck. One method is to connect them underneath a fork-mounted hook. One more way is to connect them to a carriage mounted jib or a fork-mounted jib. Both the semi automatic and the automatic have a drum capacity of 210 liters. With the automatic, there is no need for the person operating it to ever leave the seat of the lift truck.

### Rim Grip Handler

The Rip Grip Drum Handler is the ideal option for lift truck attachments, whenever there is a need to store drums with inadequate space obtainable. This particular accessory could be utilized on either 120L and 210L drums. The Rim Grip Handler operates by using metal jaws in order to hold the rim of the drum. It lifts the drum and puts it down without needing any space between all of the drums. The typical model in the business is a zinc-plated handler, even though, this attachment comes available in stainless steel for the food and drink market.
