

Barrel Clamps

Barrel Clamps - Called "Barrel Clamp", this hydraulic accessory is actually used on lift trucks so as to squeeze items which you would like to transfer with the forklift. Normally, they're utilized to paper rolls, barrels, and handle kegs, together with several barrel clamp designs having the ability to revolve the load. Like for instance, the rotate function allows a lift truck operator to be able to slot in a vertically stored paper inside the horizontal intake of a printing press.
