

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora started out on a cross country journey in their RV. Freshly retired, after spending many years working with his brother to manufacture their crane company into an market leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road trip.

Whilst on their journey, John spent time conversing with past business contacts whom the Groves stopped to see along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John discovered a vast marketplace for a product that could swiftly and securely lift people in the air to accomplish upkeep and other construction services.

After returning from their trip, John set up a partnership with two of his friends and bought a metal fabricating company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty workers, they produced and sold their first JLG aerial work platform in 1970. The business incorporates some of the simple design elements of that original lift into existing models.

JLG forklifts have come a ways from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. At present, the business proudly continues to expand itself into a range of marketplaces worldwide and develops new products to make sure consumers are capable of being more efficient and perform in the workplace within a safer environment.
